

Docket No.: 1761.1047

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

In re the Application of:

Kosuke INUKAI et al.

Serial No. 10/676.075

Group Art Unit: 3682

Confirmation No. 7758

Filed: October 2, 2003

Examiner: Hannon, Thomas R.

For:

ELECTROCORROSION PREVENTIVE ROLLING BEARING

COMMENTS REGARDING STATEMENT OF REASONS FOR ALLOWANCE

Commissioner for Patents PO Box 1450 Alexandria, VA 22313-1450

Sir:

A Statement of Reasons for Allowance was forwarded in the Notice of Allowability mailed June 16, 2003.

MPEP §1302.14 states, in part:

Where specific reasons are recorded by the examiner, care must be taken to ensure that statements of reasons for allowance (or indication of allowable subject matter) are accurate, precise and do not place unwarranted interpretations, whether broad or narrow upon the claims. The examiner should keep in mind the possible misinterpretations of his or her statement that may be made and its possible estoppel effects.

The Examiner characterizes certain features of various claims. But the Examiner has not recited the appropriate language for the appropriate claims as pending and allowed in the application.

By way of example, the Examiner states "[t]he prior art taken as a whole neither teaches nor renders obvious the structure and functions of the claims including for example the electrically insulating layer in combination with a reference plane..."

Independent claim 16 does not recite a reference plane.

The foregoing is merely meant to be exemplary, and does not point out all of the discrepancies between the Examiner's Statement of Reasons for Allowance and the claimed features of the currently pending claims.

It is further submitted that the claims speak for themselves and should not be interpreted based on the Examiner's characterizations of same. It is also submitted that the claims provide their own best evidence as to the reasons for allowance.

In summary, it is submitted that the Examiner's Statement "raises possible misinterpretations... and possible estoppel effects" (M.P.E.P. §1302.14) and is therefore improper.

Respectfully submitted,

STAAS & HALSEY LLP
